

How to create your own 'stalactites and 'stalagmites'.

You will need: 2 jars
A piece of string
2 small weights
Epson salts
Water
A plate

Fill the jars with warm water, mix in Epson salt until no more will dissolve. Wet the string and attach small weights to either end. Drop one end of the string into each jar. Place the plate in-between the two jars.

In just a few days you should see mini 'stalactites' and 'stalagmites' form.
